

ABSTRACT OF THE DISCLOSURE

The golf ball of the present invention comprises a cover wherein the cover is made from a cover material including a cured product of the thermosetting resin composition; and the stiffness modulus and shore D hardness
5 of the cover material satisfy a following equation.

$$2.0 \leq A/B \leq 5.0, 40 \leq B \leq 60$$

A: Stiffness modulus (MPa)

B: Shore D hardness
